

# Banking Information and Hyperwallet Registration Guide

Last updated: July 2022

The purpose of this guide is to walk through the steps to add banking information and register for Hyperwallet.

If you do not already have a U.S. bank account, you may be able to obtain one through Hyperwallet. Hyperwallet can provide you with a U.S. account, which you can provide to AWS Marketplace for your AWS Marketplace disbursements.

Hyperwallet is an independent service provider that enables you to transfer funds to another bank account in a supported currency. For a limited time, you will not be required to pay certain Hyperwallet service fees (0.8%) in connection with AWS Marketplace disbursements.

Note: Hyperwallet is only available to sellers from Eligible jurisdictions for paid products.

### Prerequisites

- You must enter your tax information (and value added tax information, where applicable).
- Your tax information must match the country where your AWS account is located. See <u>Account Location</u> for more info.

### Steps to set-up Hyperwallet

By following the steps below, users can register for Hyperwallet and integrate with their AWS Marketplace account.

#### Step 1

Sign in to the <u>AWS Marketplace Management Portal</u>, and choose **Settings**, then select **Complete banking information** in the **Payment Information** section.

#### Step 2

Choose **No** in response to **Do you have a US bank account?** and **Are you registered with Hyperwallet?** You will be provided with a personal identification number (PIN) and link to sign up for Hyperwallet.

**Note**: If you do have a U.S. bank account or you don't need Hyperwallet: Simply indicate "Yes" in having a U.S. bank account and fill up the fields with your relevant U.S. bank account details, as seen at **Step 12**. You will not have to go through the Hyperwallet steps.
