

AWS MARKETPLACE FEATURE ANNOUNCEMENT

# New Status Values for Resale Authorization in AMMP

## New Status Values for Resale Authorization in AMMP

AWS Marketplace Management Portal (AMMP) now has expanded resale authorization status values and the ability to see how many times a resale authorization was used to create a Channel Partner Private Offer (CPPO).

### What are the new *status* fields? What do they mean?

- Active – Opportunity is valid and can be used to create a CPPO
- Expired – Opportunity is no longer valid (has exceeded resale authorization duration)
- Restricted – Opportunity has been manually deactivated by ISV
- Complete – Opportunity has been used to create a CPPO for a single-use authorization

### What does the new *times used* column mean?

- The ISV can authorize a Channel Partner to create multiple CPPOs based on one authorization. The *times used* column shows how many times the opportunity was used to create a CPPO.

### What are the different types of opportunities and use cases around them that show in the *times used* column?

- Single use – ISV authorizes Channel Partner to use opportunity once. In this scenario, *status* will be **Complete** and *times used* column will show '1'.
- Specific time duration – ISV authorizes Channel Partner to use the opportunity to create CPPOs multiple times until the expiration date. In this scenario, *status* will remain **Active** until the expiration date and then will be **Expired** once the expiration date has passed. *Times used* will show the number of times the Channel Partner used the opportunity to create a CPPO.
- No set time duration- ISV can authorize Channel Partner to use the opportunity multiple times without an expiration date. The *status* will remain **Active** unless the ISV manually deactivates the opportunity, which will change the status to **Restricted**. *Times used* will show the number of time the Channel Partner used it to create CPPOs.

# Opportunity Duration Selection

## Opportunity duration

**Opportunity time length**  
Define how long the specified resellers are authorized to create offers using the specified discounts

**Single use**  
Allows for a single offer to be created per product specified

**Specific time duration**  
Opportunity expires after the date specified below

**No set time duration**  
Lasts until you manually deactivate the opportunity

**End date**
